

## **DIVING IN GILI TRAWANGAN WITH SANCTUM DIVE**

Fun dives from 10 meters to 40 meters and is composed of coral gardens, coral ridges and walls. Travelling time only 10-15 minutes by boat; gives you access to 4 dives every day.

All the dive sites are normally very easy suitable for beginners, however we decide the conditions daily on site to make sure you have the best dive of the day.

Dive groups are small with a maximum of 4 divers per guide. Dive times is around **9:00**, **11:00** and **14:00**, with night dives available on request.

The diving on the Gili Islands is excellent is all year round, with drift diving being the predominant form. March to October has very reliable weather and warm both in and out of the water. We always have some sites sheltered from prevailing seasonal weather conditions and typically lose only three or four days diving a year due to rough conditions. Water temperatures range from 27° to 30° Celsius (80° to 86° Fahrenheit).

### **SHARK POINT**

Located on Gili Trawangan's north-western edge and sloping into the Lombok Strait, this dive site has everything! Wide ridges, a fall to more than 50 meters, jack fish schools, sharks, and a 30-meter tug boat wreck to play on. Closer to the shore, the site is shallow to as low as 5 m, where there is a huge number of tortoises among rolling coral fields and bommis.

Arguably the most popular dive sites, this dive site is not to be missed

**AVG DEPTH: 17M | MAX DEPTH: 40M | OPEN WATER**

### **TURTLE HEAVEN**

Turtle Heaven is located on Gili Meno's north-east side. Big healthy population of different kinds of hard corals. Has a load of nutrients and its place in the present means a lot of fish food is available. And a ton of turtles-both Hawksbill and Green Sea, as the name implies.

Good for snorkling and novice divers, but also fun for people going up to 30 m and beyond.

**AVG DEPTH: 17M | MAX DEPTH: 36M | OPEN WATER**

### **SUNSET REEF**

Sunset Reef is on the southwest side of Gili T. Huge rolling coral plains, rich in soft and hard corals. A great place for divers of all levels.

The prevailing cleaning station attracts animals looking to get a good scrub down. One of the most famous visitors in recent times is Manta Rays, often seen dancing in the upper sunlight. The site also contains a load of shelters for juveniles fishes

**AVG DEPTH: 10M | MAX DEPTH: 24M | OPEN WATER**

## **DEEP TURBO**

A dive site with massive coral pinnacles rolling up from a sandy bottom.

Large schools of batfish and snappers are rolling through, with sharks often seen circling around. Blue Spotted Rays are frequent visitors, which can be seen swimming around foraging clams.

Also noticed with the current, the drift diving here.

**AVG DEPTH: 25M | MAX DEPTH: 32M | ADVANCED OPEN WATER**

## **BOUNTY WRECK**

Bounty wreck is a concrete rubble from the Jetty, that hosts multiple macro life, such as nudibranchs, shrimps and many frogfishes.

**AVG DEPTH: 12M | MAX DEPTH: 20M | OPEN WATER**
